

The Sprawl Index

Allentown-Bethlehem-Easton, PA

Overall Sprawl Index Score: 124.03

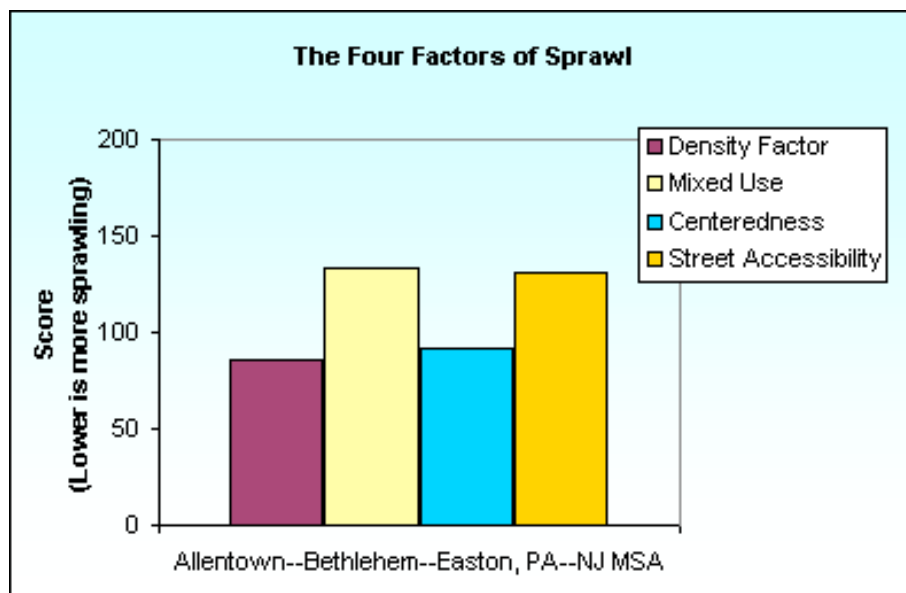

ranking it 72nd most sprawling of 83 metro areas measured.

A lower score on the index indicates a greater degree of sprawl. The average score for all metros ranked is 100. A lower score indicates below average conditions among these 83 U.S. metro areas: for example, less compact housing, a poorer mix of homes and jobs, poor street connectivity, or weaker than average town centers. A score above 100 indicates above average performance, when compared to the other metro areas ranked. Most metro areas score between 50 and 150 on the scale.

What Makes a Place Sprawling:

The sprawl index measured sprawl in four ways. Below are index scores for this metro area. See the report for a full explanation of each factor.

Sprawl Factor	Index Score	Ranking out of 83 <i>(most to least sprawling)</i>
Residential Density Factor	86.25	18
Mix of homes, jobs & services	133.39	78
Strength of town centers/downtowns	91.70	27
Accessibility of street network	131.02	72
